

Lake Wallkill

Aquatic Supervision Plan

(This document is a requirement for all operators of public beaches/swimming facilities in the state of NJ. The Vernon Board of Health is responsible for insuring the state regulations are followed including the documented aspects of this plan. The Vernon Board of Health typically conducts Two inspections at Lake Wallkill each season)

Aquatic Supervision Plan

Lake Wallkill

Lake Wallkill has 275 feet of beach front. The swimming area for Lake Wallkill is defined by a series of ropes and buoys that run from the left side of the beach to the far side of the diving towers as noted in the attached diagram.

During bather load of up to 60 bathers, (usually Monday – Thursday), 3 guards will rotate between Beach Chair “A”, the Diving Tower Chair and break. During peak bather load (typically weekends, above 60) 4 guards will rotate between Beach chairs “A & B”, the Diving Tower Chair and break.

A lifeguard sits in their assigned chair and supervises the area indicated on the attached diagram. The Beach Guard (s) supervise the beach area as well as the area extending out to the raft (from the beach) and the side of the raft not visible from the Diving Tower Chair. The Diving Tower Guard supervises the diving platform area and swim lanes as well as the area extending out to the raft (from the Diving Towers).

In the event there are not sufficient guards to meet the requirements above (max 60 bather load), the Diving Tower Area will be closed and available guards will supervise the Beach area. In the event the number of bathers exceeds 60 for any one guard position, the guard will instruct a suitable number of bathers to remain out of the water until the maximum of 60 is reached.

The number of daily bathers shall be recorded in the log contained in this plan.

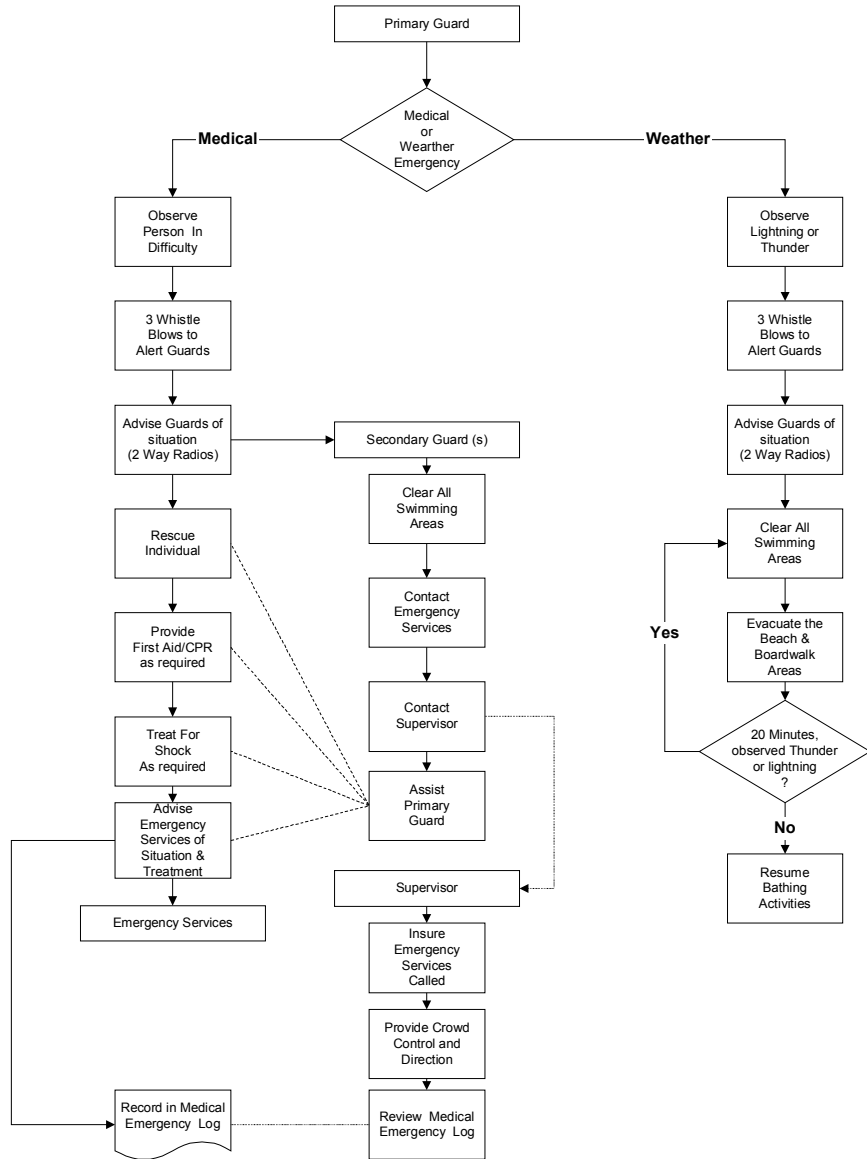

Rules & Regulations –

The Rules & Regulations to be enforced by the lifeguards can be found (posted) on the back of the lifeguard stands.

Hours of Operation

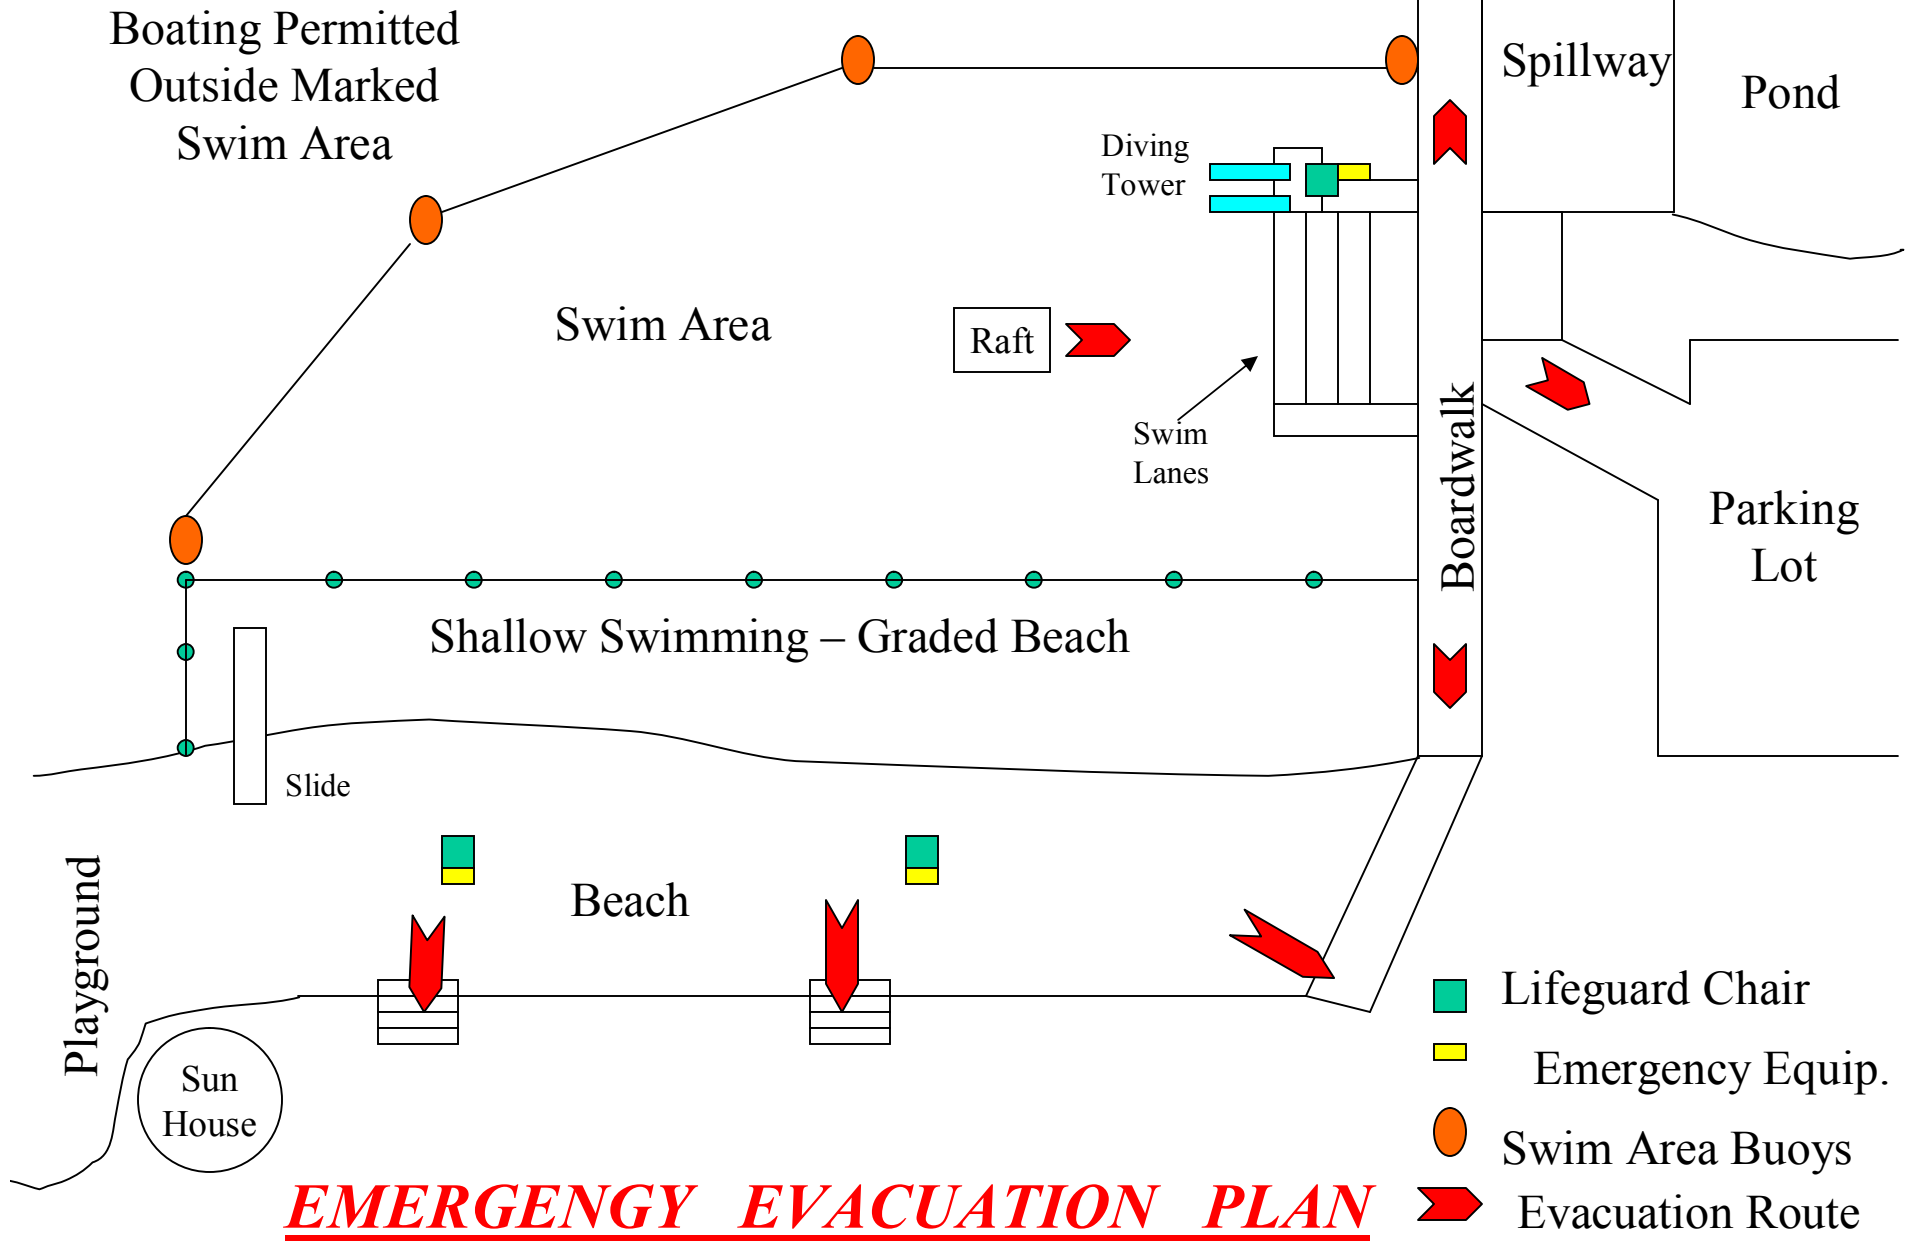

The hours of operation can be found in the Lifeguard Schedule section of the Aquatic Supervision plan. Facility opening and closing tasks can be found in the Lifeguard Job Description (Description of Duties) contained in this manual.

Emergency Flow Diagram

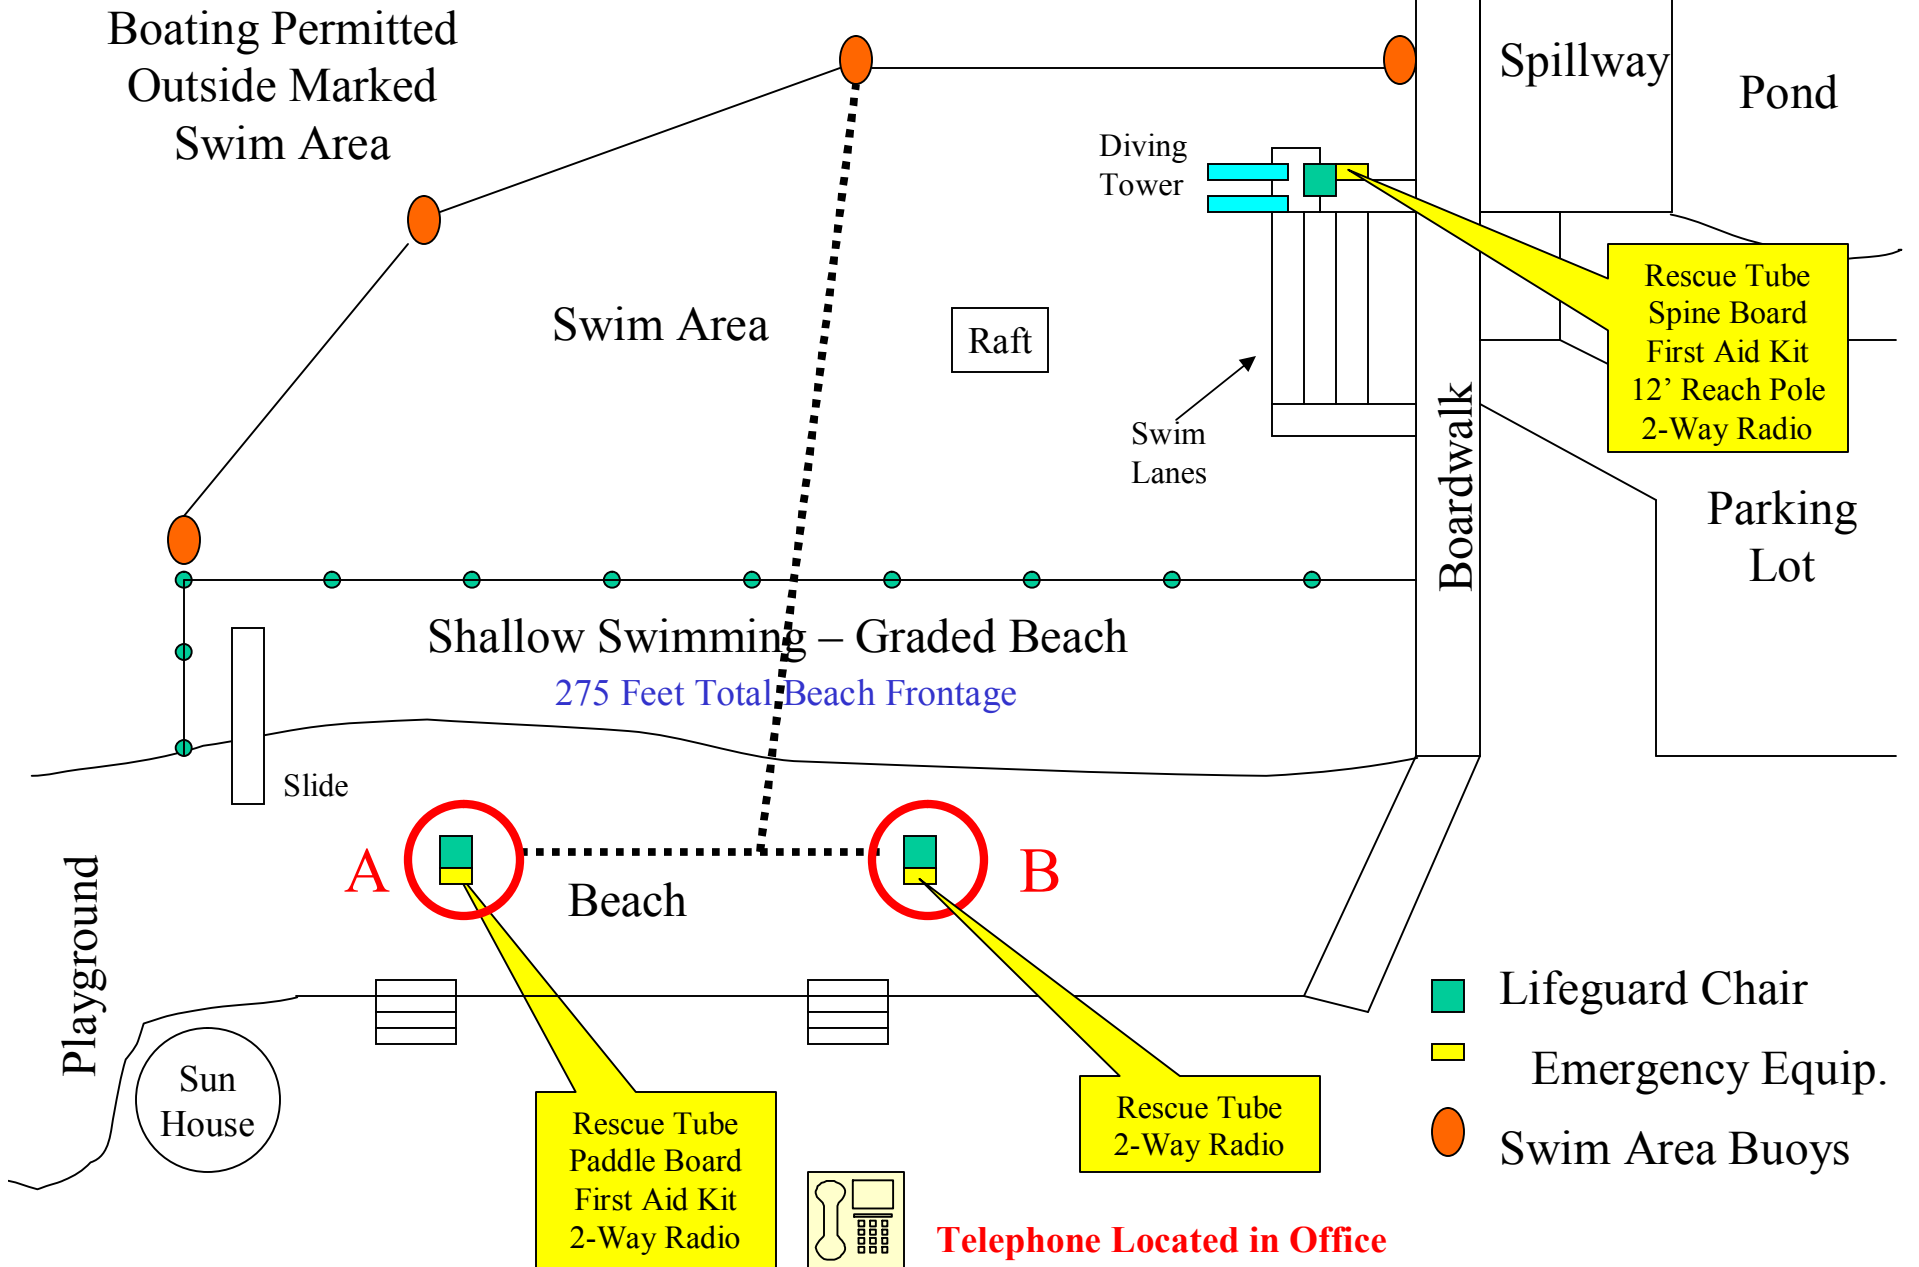

Team Reviews Emergency Procedures for any problems/issues, implement corrections for future events.

Lake Walkill Daily Bather Count 2008

To be completed daily
by the senior guard or
their delegate.

Note: The bather count is
also important to the
number and positioning
of guards (See the Aquatic
Supervision Plan) and
should be checked
periodically during the day.

Lake Wallkill Recreation Equipment Inspection Log

Year: 2008

To be completed daily
by the senior guard or
their delegate.

Note: the inspection of
equipment is an important
preventive to avoid injuries.
Any issues with the equipment
should be immediately reported
to the Lake Manager and efforts
made to prevent people from
using a faulty piece of equipment.

SAMPLE

To be completed by the Lake manager at the beginning of the season.

Note: Guards should be aware that these activities are performed so they can Respond appropriately if questioned by the Vernon Health Inspector.

Date Completed	Pre Operational Assessment Task
<input type="text"/>	Beach Re-Grading
<input type="text"/>	General Hazards Inspection & Removal (Rocks, stumps, glass, etc...)
<input type="text"/>	Slide Exit Water Depth (3 Feet) and no hazards
<input type="text"/>	Diving Tower Water Depth (12 Feet extending 12 Feet beyond end of board) and no hazards
<input type="text"/>	Raft water depth (8 Feet extending 12 Feet beyond platform) and no hazards

The above items were completed in accordance with the Lake Walkkill Pre-Operational assessment of the beach and bathing areas.

Brendan Jaeger , Manager - Lake Walkkill
